***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 C.F.R. § 1.67(a) identifying this application by its Serial Number and filing date is required. See M.P.E.P. §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the United States application for patent on which the benefit is claimed under 35 U.S.C. § 120 by specifying the application serial number, filing date and status.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-8, 10-12, 18 and 21 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Lemelson.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3306

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 5 and 22-29 are rejected under 35 U.S.C. § 103 as being unpatentable over Lemelson.

Lemelson discloses the claimed invention except for the specific types of drugs which are to be injected into the tissue through the device. It would have been an obvious matter of design choice to inject the drugs as claimed, since applicant has not disclosed that any one of the claimed drugs solves any stated problem or is critical for any particular purpose, and since an object of the Lemelson device is to inject select quantities of medications and drugs within human tissue.

***Allowable Subject Matter***

Claims 9, 13-17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
